

**APPARATUS FOR COMMUNICATING WITH LAW ENFORCEMENT  
DURING VEHICLE TRAVEL AND ASSOCIATED METHODS**

**Abstract of the Disclosure**

An apparatus for communicating with law enforcement during vehicle travel and associated methods are provided. The apparatus preferably includes a department server in communication with a  
5 vehicle computer and also in communication with a plurality of law enforcement databases. The vehicle computer includes mobile data communications software and officer communications enhancing software. The officer communications enhancing software preferably  
10 includes one or more of an audio communicator to transmit enhanced audio law enforcement data received from the mobile data communications software to the officer, an incident form completing enhancer to generate and populate incident forms, and a quick  
15 mapper to quickly generate and display a site overview map such as a top plan street view to an officer.
